

Frame Size Calculator Worksheet

Width and Height

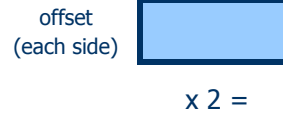

A) Measure Artwork's Original Size

Measure your artwork from edge to edge.

B) Determine Desired Mat Offset

- This is only required if your print goes to the edge of the paper and you are using mats.
- Usually either 1/8" or 1/4" on each side is used as an offset.

B) Framed Artwork Size

- Subtract the total mat offset (B) from the artwork's original size (A).
- This is the size of your framed artwork. You will enter this information into the website when asked for your artwork's size.

Notes:
